In the rugged, frontier days of the Internet 1.0 waaaaay back in the late 90s, one game was widely recognized in middle school computer labs across the country: Space Penguin. It was a quaint, plucky game with the simple goal of launching a penguin via slingshot into a black hole, assisted by planetary gravity along the way. My nostalgia had me thirst for a new Space Penguin for the modern age, and that's when I found Luna's Wandering Stars.

While the first world, Mercury, gave me the Space Penguin slingshotting I missed, I then learned with Venus that LWS is actually 9 games in one. Each planet (Yes, including Pluto) brings a new mechanic that manipulates you (the moon) in different ways. From Saturn's power to shrink and grow your mass at will, or Mars letting you shoot at obstacles, players are bound to find a favorite section of the game that will win them over. Come for the inadvertent planetary destruction, stay for the addicting quest to collect all the golden asteroids.. I really like this thing... Its fun flying around... cool concept!. Most boring:(:(. Such a calming time passer. This game is a total waste of money, the game description states:-

"fun way to learn Basic English pronunciation and words."

I fail to see how this game will teach a child pronunciation!. This game is actually awesome, I had fun. The price is very fair. The only issue I encountered is I got a bit dizzy when it began moving really fast (but that's just my personal experience, I don't experience locomotion in the best way. After a while I got used to it.) This game doesn't have too much to offer but what it does it does it well. Few more graphic options and extra levels would make this game beyond awesome.

I only brought this dlc because of the celica, as the rest of the pack doesn't interest me one bit, as we have many "serious" race cars in the game now.

But thankfully at least kunos gave us one fun car to throw about on road tracks.
And ohh my, the celica is great fun, feels brilliant on the transfagarasan north hill climb!.

I personally wouldn't recommend this dlc just because with what I said on the first sentence. BUT as it works and looks good I can't give a bad review :).

Please kunos give us another japanese car pack or a hot hatch car pack or etc, just something fun!. I know you dislike people's opinions, but people will love it honestly!.. It's 2019 and I still like this game.. this pack is pretty useless! if i could refund the\2665\2665\2665\2665\2665\2665i would! just get the lures out of pumpkins and the rods u already have are guaranteed to be better than the ones in this pack. Getting this pack aint going to make it any easier to get halloween fish coz the rates are garbage! just more ways for them to make money! FIX YOUR GAME!. the game title says it all.... Very fun shooter, I had a lot of fun with this one.. think company of heroes... but without unlimited ammo and fuel.
steal uniform parts, guns, gear and vehicles from enemies... then use them
nothing more satisfying than stealing a flak cannon and using it on a good wave of troops.... pop!
you can manually target with any gun... a lovely stolen Tiger's main gun is a beautiful thing to boom across a map
fan of the series!
